(54) Title: CHAIR HAVING AUTOMATICALLY ADJUSTABLE BACKREST

(57) Abstract: The present invention relates to a chair having an automatically adjustable backrest for thereby preventing various backbone-related diseases, and in particular to a chair having an automatically adjustable backrest for thereby preventing various backbone-related diseases in which a user's backbone is safely protected in such a manner that a chair backrest is automatically adjusted based on a user's weight, and a user's back is safely supported, so that a user can sit in an upright posture even when a user sits in a seat in a state that a user's back is not properly supported by a backrest of a chair wherein a user uses various kinds of chairs including a seat that has four legs supported by the floor or that is adjustable in a forward or backward direction in a vehicle.
